

Enhance the effectiveness of your HR department in 2012!

-  Imagine, your employees wouldn't need to interrupt your HR departments daily workflow by requiring information, such as overtime, bonus, flex-hours, absence, and vacation?
-  Imagine, you could cut down on manual registrations and processes to manage your time and attendance registrations and payroll.
-  Imagine you only would have to make all registrations into one system, retrieving instantly realtime data.

Does that appeal to you? Then you certainly will gain benefit from gathering information about Dynaway BLUE! Dynaway BLUE is a simple touch based client, handling your employees registrations directly in your Microsoft Dynamics AX ready for output to the payroll!

What do Dynaway BLUE customers say?

Nammo

"We are really happy with Dynaway BLUE. Dynaway has also proved to be a very flexible supplier whenever we have wanted to customize the standard solution. The uptime in Dynaway's solution is incredibly high - almost 100 per cent - and this makes a big difference to us."

DAKA

"In terms of design, the Dynaway solution is a quantum leap forward. At the same time, the terminals are so closely integrated with our ERP system that all employee entries are automatically recorded in the right accounts BLUE makes it efficient to administer pay, vacations and absenteeism. Plus, our employees find the solution intuitive and easy to use. That was what we wanted to achieve".

Idealcombi

"With Dynaway BLUE in combination with Dynamics AX we are in complete control real-time. Feedback from the factory floor, whether manually from employees or automatic from PLC's, goes directly into the ERP system, providing us with instant insight into ongoing productions. And when making changes to productions already running, the path from planning to the physical PLC's is not through a multitude of software systems."

How much does time registration cost your company?

We have made calculations for you, based on 11 years of experience with time registration in over 237 companies. [Interested in getting to know more? Contact us for further informations.](#)

8 quick questions:

- Do you encounter failures in the registration?
- Do you encounter system downtime?
- Do you miss documentation for absence causes?
- Do you use schemes for timeregistration or project registration?
- Are you using resources for manual control of registrations?
- Do you have an overview over time used for indirect activities, i.e. meetings?
- Do you have an overview over breaks, overtime, and compensation for overtime?
- Did you eventually experience data loss with the existing system?

Can you confirm one, or more of those critical issues, getting to know your possibilities with Dynaway BLUE will make a difference for you.

Recent Dynaway BLUE installations

Avondale Foods Ltd. implements Dynaway BLUE

Avondale Foods Ltd. has in record time implemented Dynamics AX 2009 and Dynaway BLUE with their Dynamics AX partner SYSCO Ltd.

The project includes integration to custom weight scales to allow efficient and semi-automated picking.

In general the Dynaway BLUE solution is a perfect match for process industry customers with out-of-the-box support for batch-id, picking, catch-weight registration, quality orders, quality documents and much more!

Premier Is selects Dynaway BLUE

Premier Is, a Danish producer of ice-cream, has selected Dynaway BLUE. Premiere Is has been in the ice-cream business since 1933 and produce more than 300 different ice-cream items.

A key focus area for Premier Is in their Dynaway BLUE project has been **“Overall Equipment Efficiency”** (OEE), and as part of that, proper registration of machine-down-time causes.

As a result of valuable input from Premier Is it is now possible to register for instance **“The Six Big Losses”** through Dynaway BLUE, and thereby get a much deeper and more fine-grained insight into what decreases the efficiency and throughput of the machinery.

Sanistål selects Dynaway BLUE

Sanistål is Denmark’s leading wholesaler to Danish industrial and handicraft companies within tools, machinery, technical products, Carl F fittings, electrical products, service vehicle interior, HVAC, water & drainage as well as steel and metals.

The Sanistål Group is represented all over most of the world and is renowned as a reliable supplier of solutions for the building and construction industry also dealing with sales of industrially architect-designed brands.
