Mobility - New module configurations

Label	Description
Under the *Gantt chart* node	
Enabled	Determines if the user is allowed to view gantt charts. Default value: **false**
Manage Gantt charts	Determines if the user is allowed to manage gantt charts. This includes create, update and delete gantt charts and combines the three separate module configurations from before for creating, updating and deleting. Default value: **false**
Under the *Work execution* → *My calendar* node	
Start of work day	Sets the start of the calendar day for the user. The value is in number of seconds since midnight meaning 21600 is 6AM, 25200 is 7AM, etc. This is used when creating a new planning note on the day when nothing else is already scheduled. Default value: **0**
Under the *Work execution* → *Work orders* node	
Kitting information	Determines if the user should see work order kitting information on work order and work order line details pages. Default value: **false**
