Release Date	Versions
 29 Jun 2026	Updates for Mobile Client 2607.1.1 Updates for D365 Finance & Operations 2607.1.1

Note to installation - New Certificate

Release 2604.1 includes new code signing certificate as the previous one expired. Therefore before upgrading to version 2604.1 please request new license file from Dynaway and apply new license file when upgrading to version 2604.1.

If you do not apply new license file when upgrading to version 2604.1, you will not be able to use Dynaway products!

Note to installation - Installing Dynaway Scheduling Board

Release 2601.1 replaces "Dynaway Planning Board" with "Dynaway Scheduling Board". Installation must be done with virtual path **scheduling** specified on the Web App, the authentication must be **https://<Web App Default Domain>/scheduling/login/success** and when files are uploaded the site can then be accessed from "https://<Web App Default Domain>/scheduling"

Dynaway
An EG Product

1 Products Released July 2026

- Enterprise Asset Management
 - Advanced EAM
 - Analytics
 - Asset Service Management
 - Contractor Management
 - Maintenance Data Import
 - Import Planning Notes, **NEW**
 - Maintenance Insights
 - Mobile Client - Scheduling Board
 - Mobile Client - Work Execution

Labels are in en-us only.

The deployment package has been built on:

- *Installed product version : 10.0.47*
- *Installed platform version : Update71*

The mobile applications have been tested on the following browsers, all browsers using the latest build at the time of release:

- **Desktop**
 - *Chrome version 149 on Windows 11 desktop*
 - *Edge version 149 on Windows 11 desktop*
- **Android**
 - *Chrome version 149 on Android phone (running Android 16)*
- **iPad**
- **iPhone**
 - *Safari for iOS 26.5*
 - *Edge version 149*
 - *Chrome version 149*

Known issues:

- *If using the Edge browser on iPhone or iPad, and signing in to your AD account, closing down the browser will delete all cached data for the application and the user has to synchronize all data again.*
- *On some Android phones the event telling the browser that the virtual keyboard is closed does not fire resulting in save buttons sometimes overlapping close/cancel buttons.*

Installation guide for mobile can be found here: <https://help.dynaway.com/mobile-eam/getting-started/>

2 Upcoming Changes

2.1 Dynaway Mobile Client Installation

This does not happen yet but is a notice to inform you that it is coming.

The installation and update process for the Dynaway mobile clients will change.

We are striving to make it easier to manage the installation and upgrade process for the Dynaway mobile clients which will lead to updated installation guide, just one installation package no matter which mobile clients you are using, upgrading can be done with a simple script minimizing the risk of faulty input. We are also removing the need to update the web.config file of applications but rather use environment variables in the Web app - these will also be manageable through a script.

3 Summary

In this version, of particular note are:

- **Mobile Client**
 - **Work execution:**
 - **On-hand item search:** We have updated the item search to be able to only search in on-hand items, and based on module configurations automatically filter to the desired site and warehouse - these filters can also be changed by the user.
 - **Environment label:** An environment label, manifested as an overlay in the top left corner of the screen, can now be set up. The background color and text are fully configurable.
 - **Scheduling board:**
 - **Context menu:** We have introduced a context (right-click) menu to scheduled cards and planning notes. This gives the planner quick access to actions such as: Unschedule, Split, Open in D365 and more.
 - **Planned absence:** We now show and work with planned absence. If a worker has planned absence set up in D365, events from there will be shown on the Scheduling board and effect the available capacity of the worker.
 - **Performance and layout:** We have improved performance in loading and displaying data. We have also improved read-only mode display to show more in a more compact manner, and the day view, both in read-only and standard mode now shows data in a more compact manner to improve overview for the planner.

4 Installation Notes

4.1 Asset Management Models

To make the process of migrating from EAM to AM easier, we have added all models needed for AM.

5 Updates for Mobile Client 2607.1.1

Installation guide for mobile can be found here: <https://help.dynaway.com/mobile-am/getting-started/>

5.1 Module Configurations

Label	Description
Under the <i>General</i> → <i>Environment</i> node	
Environment color	Gives a color of the background of the environment label for the application. If a color is selected but no title, the title will be the current legal entity.
Environment title	Gives a text to the environment label for the application. If a title is selected but no color, a default gray color is used.
Under the <i>Work execution</i> → <i>Requests</i> node	
Request types available	Determine which request types the user can select from. If none are selected, all will be available.

Key	Client Release Notes
DMO-15828¹	General - Environment Label Users can now set a label in the mobile application to display the environment or legal entity. The feature is controlled through the module configuration under <i>General > Environment</i> . If no label is configured, the current legal entity is displayed automatically.
DMO-16406²	General - Synchronization Improvements Improved synchronization behavior when Dynaway Work execution is open in multiple browser tabs. Only the active tab now prompts for synchronization. When users switch to a different tab, the newly active tab automatically triggers synchronization.
DMO-17219³	General - Direct Link to Pages in Application Sometimes not Working Fixed an issue that occasionally prevented direct links from opening application pages correctly. Direct links now navigate users to the intended records more reliably.

1. <https://jira.eg.dk/browse/DMO-15828?src=confmacro>

2. <https://jira.eg.dk/browse/DMO-16406?src=confmacro>

3. <https://jira.eg.dk/browse/DMO-17219?src=confmacro>

Key	Client Release Notes
DMO-17062 ⁴	Requests - Update Asset Users can now assign an asset to requests that were created in D365 Finance & Operations without an asset. Requests without an assigned asset display a "Missing" placeholder in the asset field on both the search page and details page. Users can select the asset field from the details page or use the edit option to assign an asset.
DMO-16172 ⁵	Scheduling Board - Add Option To Show More Text A new "Show all text" preference has been added to the Scheduling board. When enabled, the full text of the selected title properties is displayed on cards.
DMO-17177 ⁶	Scheduling Board - Calendar Jumps Back When Starting a Draft Fixed timezone-related issues that could affect calendar navigation and display on the Scheduling board. The calendar no longer switches to an incorrect day or week after dropping a card, and the current day is now displayed correctly.
DMO-17021 ⁷	Scheduling Board - Context Menu Additional actions have been added to the Scheduling board context menu to support faster navigation and scheduling activities. Planners can now do the following additional actions from the context menu: • Unschedule work directly from the context menu. • Open scheduled work in Work Execution or D365 Finance & Operations. • Delete planning notes without opening additional dialogs.
DMO-16985 ⁸	Scheduling Board - Dragging While Detailed View is Off When the "Detailed view" preference is disabled, planners can now see a card on the board while dragging work from the sidebar. This makes it easier to determine where and to whom the work is being scheduled before dropping the card.
DMO-15183 ⁹	Scheduling Board - Planned Absence Planned absences registered for workers in D365 Finance & Operations can now be displayed on the Scheduling board. When enabled, planned absences appear as read-only calendar entries, providing planners with better visibility into worker availability. The feature is enabled per scope through the module configuration <i>Dynaway mobile > Setup > Module configuration > Scheduling board > Planned absence</i>.

7. <https://jira.eg.dk/browse/DMO-17021?src=confmacro>

8. <https://jira.eg.dk/browse/DMO-16985?src=confmacro>

9. <https://jira.eg.dk/browse/DMO-15183?src=confmacro>

Key	Client Release Notes
DMO-14111 ¹⁰	Scheduling Board - Read-only Mode and Day View Enhancements Read-only mode: - Enhanced to display more cards within each calendar cell when horizontal space is available. - To maximize the number of visible cards, the capacity bar, hours badge, and priority badge have been removed from board cards in read-only mode. - These improvements are available across all calendar views: Day, Week, Two weeks, and Four weeks. Day view: - Horizontal card stacking is now available in the Day view while using editable mode.
DMO-16540 ¹¹	Scheduling Board - Autosplit on multi-schedule cards Autosplit is now supported for cards containing multiple schedules. Schedules are split according to their current schedule sequence, ensuring the earliest scheduled work is split first, i.e. whatever is scheduled first will be split first etc. The autosplit action is available from both the card information dialog and the context menu.
DMO-10905 ¹²	Scheduling Board - Event Overflow on First Load Fixed an issue where events could overlap each other and extend outside the calendar boundaries when the Scheduling board was first loaded. Events are now displayed correctly when the board is opened.
DMO-16622 ¹³	Scheduling Board - General Performance Improvements Performance and navigation have been improved throughout the Scheduling board. Enhancements include optimized saved search list refreshes, reduced data loading when switching between views, and a number of minor improvements that contribute to a more responsive scheduling experience.
DMO-17124 ¹⁴	Work Orders - Asset Search Typing Backwards Resolved an issue where text entered in search fields appeared in reverse order on Android devices when using large text settings or smaller screens. Search fields now display entered text correctly.
DMO-13309 ¹⁵	Work Orders - Item Registration Site and Warehouse Filter Users can now filter item searches by on-hand inventory when registering items on a work order. A site and warehouse can be specified to limit the item list to items with available stock at that location. When the module configuration <i>Work execution > Work orders > Registrations > Worker default site and warehouse</i> is enabled, the site and warehouse fields are automatically populated based on the work order functional location or the Asset Management worker's default site and warehouse.

14. <https://jira.eg.dk/browse/DMO-17124?src=confmacro>

Key	Client Release Notes
DMO-17265 ¹⁶	Work Orders - Handle Repeated Registration of Hours Resolved an issue where the same hour registration could be submitted multiple times. This helps prevent accidental duplicate hour registrations.
DMO-16984 ¹⁷	Work Orders - Hour Registrations Change Hours With No Change Resolved an issue where hour registrations and other journal registrations could be updated even when no changes were made. This also resolves an issue where the registration date could be changed to one or two days earlier than intended.

6 Updates for D365 Finance & Operations 2607.1.1

Key	Client Release Notes
DFO-1049 9 ¹⁹	Advanced EAM - Export Work Order Hour Journal Lines A new data entity, "EAM Work order line hour consumptions", is now available for exporting work order hour journal lines. The data entity is read-only, allowing users to export time registrations. It does not allow importing time registrations.
DFO-1143 0 ²⁰	Advanced EAM - Fixed Blank Planner Values On Request Created With Functional Location Fixed an issue where planner values were not updated based on the planner setup when creating a request with only a functional location. <i>Planner group</i> and <i>Planner values</i> are now populated correctly on requests according to the configured planner setup.
DFO-1143 7 ²¹	Advanced EAM - Fixed My Planner Work Orders and My Planner Requests Fixed an issue where the <i>My planner work orders</i> and <i>My planner requests</i> pages did not display the relevant work orders and requests on which user has been set up through their planner group.
DFO-1109 9 ²²	Advanced EAM - Work Order Report - Work Order Kits A new "Work order kits" section has been added to the <i>Work order report</i> . The section displays basic information about all work order kits related to the work order.
DFO-1121 2 ²³	Enterprise Asset Management - Fixed Blank Responsible Values On Request Created With Functional Location Fixed an issue where responsible values were not updated based on the responsible worker setup when creating a request with only a functional location. <i>Responsible worker group</i> and <i>Responsible worker</i> values are now populated correctly on requests according to the configured responsible worker setup.
DFO-1120 3 ²⁴	Enterprise Asset Management - Fixed Record Exists Error in Work Order Project Setup Page Fixed an issue where the <i>Work order project setup</i> page displayed a "The record already exists" error when adding a new record with a combination of values that already existed. The system now handles this scenario correctly by automatically adjusting the dates when they overlap with another record that has the same combination of values.
DFO-1118 2 ²⁵	Enterprise Asset Management - Fixed Problem With Deleting Functional Location Lines in Rounds Fixed an issue where users could not delete functional location and object lines in <i>Rounds</i> after scheduling them, even after the dependent calendar lines had been removed. Users can now delete functional location round lines and object round lines after all dependent calendar lines have been deleted.

Key	Client Release Notes
DFO-10340²⁶	Maintenance Data Import - Import Planning Notes Users can now import planning notes from a text file using the Maintenance Data Import tool.
DFO-11441²⁷	Mobile - Fixed Attachments Not Visible on Work Order Line and Checklist Line Fixed an issue where after creating from mobile app new work order or adding new work order line to existing work order attachments copied automatically from job type setup have not been visible on created work order line and checklist lines.
DFO-11320²⁸	Mobile - Maintenance Request Entity Missing Functional Location Information We have fixed an issue where functional location information was missing from the request entity. This issue occurs when asset is empty on a request.
DFO-11443²⁹	Mobile - Object Document Attachments Not Showing up in Mobile Fixed an issue where attachments linked to object documents did not appear in the mobile application when the object documents were imported using the <i>EAM Object document attachments</i> entity.
DFO-11070³⁰	Mobile - Fixed Database Deadlock When Using Paginated Synchronization Fixed an issue with paginated synchronization that could cause database deadlock errors when multiple users were synchronizing changes in the mobile application at the same time.
DFO-11153³¹	Mobile - Purchase Requisition Category Performance Improved the performance of purchase requisitions when the 'vendor' field is mandatory. Customers with many vendors and/or categories may have experienced slow category loading or time-outs. Category loading is now significantly faster in these cases.
